

FASHION[®]
FROM
PORTUGAL

PORTUGUESE PRIVATE LABEL

The Portuguese textile and fashion industry is Europe's last complete and integrated business cluster. It is also the most dynamic cluster and the one which better interprets modern business models based on speed, creativity, innovation, sustainability and market proximity.

Collection creation, spinning, weaving, knitting, finishing and printing, home textiles, technical textiles and manufacturing, logistics and distribution: the world of the Portuguese textile and fashion industry is vast, rich and stands tall as global scale state-of-the-art.

Over € 7.3 billion in sales, over € 5 billion in exports to more than 160 countries, offering over 130,000 jobs, served by world-renowned Universities and Technology Centers. All of this in a small area around the city of Porto, a vibrant metropolis connected to the world by modern infrastructure. Portugal remains the last stronghold of the textile and fashion industry and stands as a model for the future.

Not only does the Portuguese textile and fashion industry create high quality industrial products, it also offers integrated solutions. Based on decades of tradition and experience, enriched by creativity, technological innovation and hard work, "PRIVATE LABEL" is given a higher meaning through its implementation as a true partnership with brands, a value proposition that is today unanimously recognized and praised the world over.

With a reputation for the world's shortest lead time, companies in the Portuguese textile and fashion industry are able to respond to a client's request, depending on the products, in 2 to 6 weeks from order to retail delivery, a performance unmatched by any competitor on the global market.

In a business where speed, flexibility, reliability, creativity and innovation are part of the business model of a company and brand any brand, excellence in response is unreplacable, priceless and ever more valuable.
